About Touchstone

Touchstone Asset Management is an Australian equities manager with an index unaware approach to investing in quality companies at reasonable prices. We aim for improved long-term investor returns, while also providing downside protection in adverse markets.

- **Quality at a reasonable price:** Our approach to investing can be described as 'quality at a reasonable price' (QARP), based on the careful consideration of both investment risk (quality) and expected return (price).
- **Style unaware:** This produces a portfolio that can include both value and growth stocks, depending on the risk/return trade-offs available across our universe of stocks at any given time.
- **Index unaware:** We combine bottom-up fundamental analysis and an index unaware approach to capital allocation, where portfolio positions are based on the risk/return trade-off inherent in each opportunity, rather than index weights.

Long-term performance

Growth of \$10,000 since inception^{2,3}
